207-303-2524 | yukiyao119@gmail.com | [LinkedIn](#) | [Blog](#) | [GitHub](#) | [Portfolio](#)

Full Stack Developer with a strong background in E-commerce and SaaS and a degree in Engineering. Through years of experience at tech startups and Fortune 500, I utilized vast knowledge to analyze, communicate, improve, and resolve product and operation issues.

## TECHNICAL SKILLS

JavaScript, Ruby, HTML, CSS | PostgreSQL | React, Redux, Ruby on Rails | Wordpress | Adobe Photoshop, Sketch

## TECHNICAL PROJECTS

[Resources Xchange](#) - React | Redux | Rails API

[Github](#) | [Website](#)

*Help people all over the world to learn new skills by having online skill exchanges*

- Used **PostgreSQL** for data storage and management
- Performed profile data fetching with React Hook **useEffect**
- Utilized **Google Maps JavaScript API** to display user map based on their coordinates
- Designed Skill Board layout using Semantic UI and **CSS Flexbox**

[Project Planner](#) - React | Rails API

[Github](#) | [Website](#)

*A project management tool to track ongoing and completed projects*

- Led the creation of **MVP** and delivered the app within 5 days
- Developed a **RESTful API** with endpoints for users, projects and notes
- Used **Semantic UI** to achieve a responsive design for the layout

[Weather Display](#) - JavaScript | jQuery Ajax | CSS

[Github](#) | [Website](#)

*Real-time weather display and converter from Fahrenheit to Celsius*

- Used jQuery **Ajax** to load data and perform the HTTP request
- Created a **CSS-only** carousel for the photo slideshow
- Standardized all output with a new, **responsive** approach and strategy

[Mini Invader Game](#) - JavaScript | HTML | CSS

[Github](#) | [Website](#)

*Invader game granting users to fight monsters in a browser based application*

- Built invader and ship elements' movement using **pure JavaScript**
- Created monster look and random color with pure JavaScript and **CSS**
- Implemented **recursion function** to check the game status and keep it running

**Volunteer Projects** - [CAFAM-Maine](#), [GeoTimeLine](#)
